Scored: 66.8%

PERSONAL PROJECTS

Paper Trading Setup

- A Django-based project that fetches data from SmartAPI to simulate real-time trading activities. It displays live stock prices, interactive charts, and tracks the performance of trades. The application also maintains a detailed trade history, enabling users to review and analyze their past trades effectively.
- <https://github.com/yeshu9098/paper-trading-setup.git>

Blog Web App

- A web-based project for a blog website, created with Bootstrap for the frontend and Python Django for the backend, using PostgreSQL as the database. This application includes features such as login, signup, adding blog posts, and comments.
- <https://github.com/yeshu9098/blog.git>

E-learning Project

- A web-based project that provides educational content, developed using React and Bootstrap for the frontend and Node.js with MongoDB for the backend. The platform displays articles created by the admin and includes quizzes to enhance user engagement and learning.
